Ques - What do you mean by Computer Networks?

Ans - A computer network is a set of ^{computers} connected together for the purpose of sharing resources. The most common resource shared today is connection to Internet.

The internet itself can be considered a computer Network.

Computers on a network are called nodes. The connection between computers can be done via cabling. Connected computers can share resources like access to the Internet, printers, file servers, and others. A network is a multipurpose connection, which allows a single computer to do more than it could without any connection.
