Q What is computer networks.

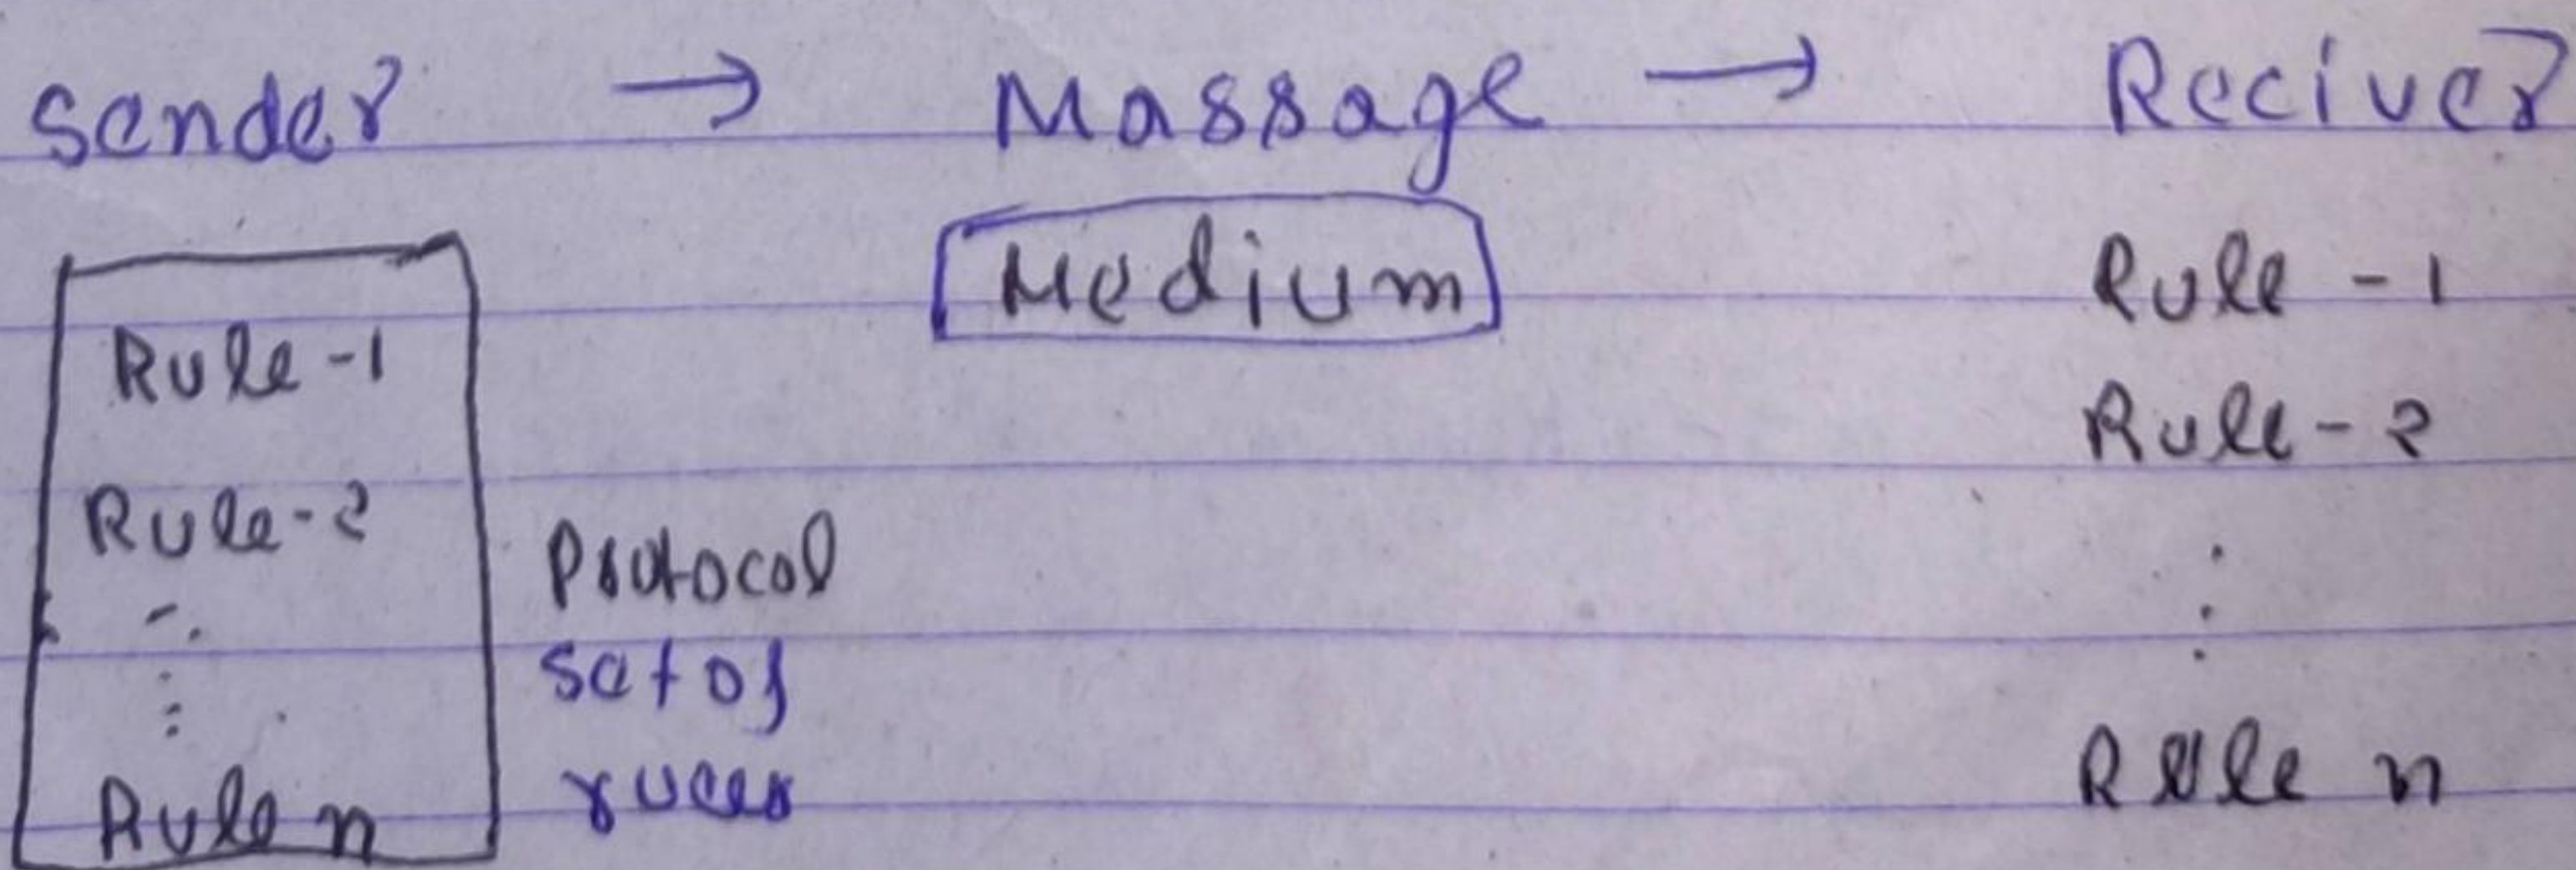

A Computer network is a group of computers that use a set of common communication protocol over digital interconnection for purpose by the network nodes.

The term telecommunication means communication at a distance.

The word data refers to information present in whatever form is agreed by the parties creating and using the data.

Data communications are the exchange of data between two devices via some form of transmission medium such as wire.

▷ For data communication we need 5 components :-
